Projects

HR Website for Aspire Corporate Solutions | Django, Html, Css, Javascript, Selenium, Bootstrap

December 2022

- Chatbot Integration: Built a real-time intelligent chatbot to assist users and boost engagement.
- Resume Builder: Developed a user-friendly tool for creating and customizing professional resumes.
- Role-Based Access Control: Implemented secure dashboards with tailored access for admins, staff, and users.
- User-Centric Design: Delivered an intuitive UI/UX for seamless navigation and an enhanced experience.
- Job Openings Portal: Designed a page for users to easily search and explore job opportunities.

Sleep Analysis of Students at Christ University Lavasa | Python, NumPy, Pandas

November 2023

- Objective: Analyzed sleep patterns and their impact on academics and extracurricular activities.
- Data Collection: Cleaned and organized survey data on sleep habits and student performance.
- Data Analysis: Used Python libraries to uncover trends and correlations through visualization.

Hospital Information Management System | Django, HTML, CSS, JavaScript, Bootstrap

February 2024

- Comprehensive System: Built a platform to streamline healthcare administration with integrated functionalities.
- User-Friendly Features: Enabled online appointments, E-Pharmacy, and a detailed medicine catalog.
- Secure Health Records: Designed a system for secure and convenient access to patient medical data.
- Medical Tracker: Developed dashboards for tracking health progress, appointments, medications, and lab results.
- Healthcare Blogs: Published blogs on topics like hygiene, women's health, and student well-being to promote
 awareness.

Technical Skills

Programming/MarkUp Languages: Python, Java, C, HTML/CSS, JavaScript
